PROJECTS

Weather Data Pipeline

Aug 2024 – Aug 2024

- Built a weather data pipeline with Apache Airflow to automate extraction, transformation, and storage of weather data using the OpenWeather API, with Python and Pandas.
- Deployed on EC2, the pipeline securely stores final datasets in Amazon S3 with IAM-managed permissions.

Real-Time Stock Data Streaming

Jun 2024 – Jun 2024

- Developed a real-time data pipeline for streaming stock data using Apache Kafka, Python, and AWS, where a producer streams stock data to a consumer that stores JSON records in an S3 bucket.
- Integrated AWS Glue for data cataloging and AWS Athena for SQL queries, enabling continuous real-time data analysis in S3.

Multi-Lingual Legal Information Retrieval System for IPC Awareness

Apr 2024 – Apr 2024

- Developed a web-based system to increase community legal awareness by simplifying legal jargon and making a dataset of the Indian Penal Code (IPC) accessible in English, Hindi, and Marathi.
- Built with Flask, Pandas, and a responsive HTML/CSS interface, the system allows users to search legal information by keywords
